The application has been amended as follows:

Please add the designation "Prior Art" to each of figures 7, 8 as indicated on the attached figures.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious wherein a displacement amount between an 80 mN to 400 mN load is in a range of 0.1 mm to 0.8 mm, and a displacement amount between a 600 mN to 950 mN load is in a range of 0.05 mm to 0.5 mm at a time of applying a load by a measurement method in a direction so as to reduce the gap between the two sheets of transparent substrates to a display area of the two sheets of transparent substrates; wherein, by the measurement method, a deformation amount against the load is measured by applying the load in a vertical direction to a transparent substrate surface with an indenter having a 2 mm.phi. plane by a 2.22 mN/sec applied load contacted with either of the transparent substrate side under a 23.degree. C. condition in combination with the rest of claim 10.

It is noted that the claim 10 is allowable because the unique combination of each and every specific element stated in the claim.

The prior art, either alone or in combination, does not disclose or render obvious wherein with a premise that a displacement amount between an 80 mN to 400 mN load is 100, a displacement amount between a 600 mN to 950 mN load is in a range of 30 to 200 at a time of applying a load by a measurement method in a direction so as to reduce the gap between the two sheets of transparent substrates to a display area of the two sheets of transparent substrates; wherein, by the measurement method, a deformation amount against the load is measured by applying the load in a vertical direction to a transparent substrate surface with an indenter having a 2 mm.φ. plane by a 2.22 mN/sec applied load contacted with either of the transparent substrate side under a 23.degree. C. condition in combination with the rest of claim 11.

It is noted that the claim 11 is allowable because the unique combination of each and every specific element stated in the claim.

It is further noted that the prior art does not teach or render as obvious the level of specificity required for the device necessitated by the elements of either claim 11 or claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
